

I am writing concerning NAB's petition 04-160, and asking you to reject it. I am a subscriber to both XM & Sirius radio, and am very impressed with the quality and variety of service.

Although I do still listen to non-satellite AM radio, the interference from power lines, limitations on broadcast coverage and lack of variety make satellite my first choice. Please do not do anything that will restrict their service or the content they can offer such as local traffic and weather.

Thank you.

Sally
